Facebook Memes

meme mēm/

noun: meme; plural noun: memes

a humorous image, video, piece of text, etc. that is copied (often with slight variations) and spread rapidly by Internet users.

I later learned the famous atheist Richard Dawkins coined this word meme which is why it rhymes with gene. Wikipedia describes a meme as ""an idea, behavior, or style that spreads from person to person within a culture". But this notion of meme is NOT supported by everyone in the scientific community. It was the Internet that introduced a valid concept of a meme.

These are some recent memes I collected from Facebook. Many of them I made myself! The easiest way to make a meme is to use an on-line service from https://imgflip.com/memegenerator
