

General Thomas McInerney Exposes “Hammer” & “Scorecard” Software that Changes Votes by 3% and Shifts Election Results

General Thomas G. McInerney

General Thomas G. McInerney, 1983

This is EXTREMELY important information that all Americans should know. It's a testimonial from former U.S. Air Force Lieutenant General Thomas McInerney in an interview with Steve Bannon. I transcribed it from YouTube to make this information more accessible. I prefer to get information from text.

Thomas McInerney (born March 15, 1937)[1] is a retired United States Air Force Lieutenant General, who served in top military positions under the Secretary of Defense and the Vice President of the United States. McInerney was a forward air controller and fighter pilot during the Vietnam War and had flown 407 combat missions during his four tours of duty.[2] In addition to his Vietnam service, McInerney served overseas in NATO; Pacific Air Forces and as commander of 11th Air Force in Alaska. He retired in 1994. (Quoted from Wikipedia)

Steve Bannon is an American media executive, political strategist, former investment banker, and the former executive chairman of Breitbart News. He served as the White House's chief strategist in the administration of U.S. President Donald Trump during the first seven months of Trump's term. (Quoted from Wikipedia)

Steve Bannon: General McInerney, thank you for joining us on war and pandemic. You've got some breaking news we got to talk about. It's one of the reasons we have Cindy Paler over here today, something very disturbing. There's been a site called The American Report.

<https://theamericanreport.org/2019/05/22/montgomery-the-hammer-surveillance-system-whistleblower-became-the-deep-states-enemy-number-one-after-exposing-the-truth/>. It's got a woman named Mary Fanning doing some incredible reporting particularly about a guy named Dennis Montgomery. What is it. There's this thing that's going around about this project or this system called Hammer. Explain to our audience what this is and why it should be of such concern to people in this current situation that we're in.

General McInerney: Yes I will, Steve. The fact is is that Hammer is a what we call a Sigit, a Sigit Intelligence program that the NSA came up with years ago. The CIA picked it up. Under the Obama administration and I broke it in April and March 2017 about what they were doing on the Russian hoax. But the fact is. The Obama administration took this system and they've put in an application in this Sigit program called Score Card. And **Score Card changes votes at a certain point in the voting stream.**

And if I can, and by the way, the Obama administration used it in the 2012 election in Florida, so both Obama and Biden are very familiar with this. Now I've got to make a quote. And it's important that we all understand it's by Joseph Stalin.

"I consider it completely unimportant who in the party will vote or how. But what is extraordinarily important is this: Who will count the vote."

Now Steve, we have a desperate Democratic Party that will do anything to bring the country to a totalitarian state and as far left as they want. They used it in the primaries. And Bernie lost to Biden because they used it in the primaries. So it is ready to go, I just found out about this yesterday. Sydney played a very important role in assisting me, and Mary Fanning and Alan Jones and trying to get the word out so the American people know all this enthusiasm you're talking about in Pennsylvania gets changed very quickly with this software program. It's with 3 percent of the votes.

Steve Bannon: General McInerney I want you give just quickly your bona fides just briefly. give me a minute for the audience on your career.

General McInerney: OK. Thirty five years in Air Force. I ended up the number three man in the Air Force, in the headquarters. I had four tours in Vietnam. I commanded the raid on Tripoli in 1986. We attacked Tripoli from my headquarters in England. I was then the vice commander in chief of U.S. Air Force in Europe, and then the commander of Alaska Command and Alaska NORAD region. So I had a very extensive operational career, and I'm in the cloud business now, and that's why I'm so intimately familiar with what Hammer and Scorecard can do, and nobody knows it. Nobody.

Steve Bannon: Okay now you're one of the most revered officers in the U.S. Air Force with an unbelievable career. I want to go to Hammer. Hammer was the single most important and the single most sophisticated basically system that

came up after 9/11 for really intelligence or counter intelligence about radical Islamic Jihad and the ability to monitor that. Is that how the beginning of this started with a foreign surveillance system that allowed the national security and intelligence apparatus to watch our enemies. Is that how this thing started?

General McInerney: That's how it started, Steve. Very sophisticated very very capable. It was then adopted with a software package just like on your iPhone to the boating business. And it was to be used and it was used in foreign countries. And so it was then moved over into the CIA and they started looking at U.S. citizens. That is illegal. The CIA cannot look at U.S. citizens. And only the FBI with the proper FISA warrant, etc. Sydney knows all about this. You know all of this. And it is extremely important that this was taken out of the CIA when the Obama administration left. They use some Kabuki to get it out. They still have it up and running. We know where it is located. We know it's active denied it's active. They've been looking at a whole host of things as has the DNC using false I.Ds. and they are looking around and they're trying to set up this voting thing that happens on Tuesday night. It's going to look good for President Trump. But they're going to change. And that's the danger that America and everybody must realize.

Steve Bannon: I just want to mention we got about two minutes here. In the next segment, Sidney (Powell) and I are going to drill down on this a little bit more and we will talk about some polling and things, but hopefully get you back before the end. Dennis Montgomery – The last time the audience heard about Dennis Montgomery he was being rounded up at his house. He had 47 hard drives. I think he had taken from Fort Meade. How does Dennis Montgomery fit into this story?

General McInerney: He is a genius and he loves America. Dennis invented Scorecard. He is the programmer that made all this happen. And he's on our side. Great curse, no, risk as well as he hasn't benefited financially from. He is an absolute genius. And so he's extremely important to what's going on. It have happened in 2016, Steve, except something happened to it that night when the Obama crowd and the Democrats tried to use it. I can't talk about that.

Steve Bannon: Dennis Montgomery is like the character Nash in Beautiful Mind (Film). I mean this is one of the smartest programmers ever. He wrote this incredibly sophisticated program. And that's why this event in August of 2015 when he was basically gathered up. He had the 47 hard drives. Heck we got one hard drive from Hunter, and we're still going through information. He did this, as we now know, he did he did this to essentially save his country and expose what's going on. What was he trying to expose and what should the American people know today on the eve of this election that 250 flag officers sent a letter to President Trump sends the most important including my old boss Tom Hayward who said it's the most important election in the history of the Republic. What what is Montgomery trying to tell us. What is the message we need to hear today.

General McInerney: Well he's telling us right now Steve that we are on the verge of being compromised through cyber warfare that he is a master of, the

most brilliant person in our country on cyber warfare, and they had used this. They moved it on the intelligence a very highly secure program and **they've moved it from there over to political treachery.** And that's what it is. And they moved it out of the CIA. They moved it from their political views as they have politicized the intelligence community as we saw in the Russian hoax. And what they've done to General Flynn, all of these things on this force you and Sydney have been talking about that want to change America from what it is. It goes back the Electoral College to the Supreme Court. All of these things are bundled that change America being a democratic republic to a totalitarian regime. That means a socialist country which the next step is communist. And that's why there can be no agreement between this Democratic Party and the Republican Party. One choice is freedom. One choice is communist. It's that simple.

Steve Bannon: Are you going to be able to stop Hammer and Scorecard?

Sidney Powell: We intend to stop Hammer and Scorecard.

NOTE: Sidney Powell is a former federal prosecutor and current attorney of General Michael T. Flynn. A veteran of 500 federal appeals, she published "LICENSED TO LIE: Exposing Corruption in the Department of Justice."

Steve Bannon: Sidney Powell says to take that to the bank. OK future FBI director Sidney Powell. I can't wait for the confirmation hearings.

Unknown person: Hey, I'd like to say what Leslie Anderson says, "Have faith, pray, and let's all meet at the pass tomorrow night."

Steve Bannon: With a stick to the plan or whatever risk that blow some heads up.
