

Why Gaddafi was demonized by the West

I believe Gaddafi was demonized by the West only after he became a hindrance to New World Order plans. Libya was one of the most prosperous countries in the middle east before the NATO (read USA, England and France) attacks! Unlike the Egyptians under Mubarak, the average Libyan enjoyed a high standard of living.

Under the revolutionary leadership of Col. Mu`ammar Qadhafi, Libya has attained the highest standard of living in all of Africa. This is all the more remarkable when we consider that in 1951 Libya was officially the poorest country in the world. According to the World Bank, the per capita income was less than \$50 a year – even lower than India. Today all Libyans own their own homes and cars. In the words of two Fleet Street journalists, David Blundy and Andrew Lycett, who are by no means supporters of the Libyan Arab revolution, “The young people are well dressed, well fed and well educated. Libyans now earn more per capita than the British. – Taken from <http://www.geocities.com/Athens/8744/libfacts.htm> Obviously written before the NATO attack against Libya.

Now what will happen to them? The same fate of civil strife in Yugoslavia after Tito’s death, and civil strife in Iraq after Saddam Hussein! Their economy is going to crash and they will lose the good standard of living they enjoyed under Gaddafi. The [wicked Witch of the West Hillary](#) is laughing now at Gaddafi’s demise, but someday the poor and meek of this world will rejoice at her demise as they did Jezebel’s! See 2 Kings chapter 9 for details. If there ever was a modern day parallel of King Ahab and Queen Jezebel of the Bible, it is doubtless [Bill and Hillary](#).

Why would the [USA, England and France](#) (read continuation of the Roman Empire) want Gaddafi dead? Three reasons, and all about *money* and *power*!

Also see The Legend of Sirte for more information about the true political realities of Libya.

Recently I've been studying the history of Japan during the the 17th and 18t century. It seems to me that the major difference between then and now, is electrical power and environment it created.
