

Quotable Quote about Evolution

“We are now about 120 years after Darwin and the knowledge of the fossil record has been greatly expanded. We now have a quarter of a million fossil species, but the situation hasn't changed much. The record of evolution is still surprisingly jerky and, ironically, we have *even fewer examples* of evolutionary transition than we had in Darwin's time.” [David M. Raup](#), University of Chicago paleontologist.”

I got this quote from:
