

Hurricanes and Geoengineering – Weather Warfare!

I've known about the use of weather manipulation as a method of warfare from years ago. Because of what happened with Hurricane Helene and what may happen with Hurricane Milton, I must tell you what reputable men have to say about this subject.

Dane Wigington explains to Col. Douglas Macgregor how geoengineering may be used in hurricanes and Weather Warfare.

Dane Wigington of [Geoengineering Watch](#) is the executive producer for the ground breaking climate engineering documentary, "[The Dimming](#)". He has a background in solar energy and was a former employee of Bechtel Power Corporation. Dane was also a licensed contractor in California and Arizona.

Douglas Macgregor is an American retired colonel, government official, author, consultant, and political commentator.

Transcript

All right. Hi, I'm Douglas Macgregor, [CEO for Our Country Our Choice](#). We have with us one of our fan favorites, if you will, and that's Dane Wigington, and he heads [Geoengineering Watch](#).

He's got some interesting **comments today in connection with the vicious Hurricane Helene** that has done so much damage to us. Welcome, Dane.

Dane Wigington: Thank you for your continued attention to what's occurring in our skies, Colonel MacGregor. This is nothing short of **all-out weather warfare** at this point. We can speculate about the agendas and objectives being carried out, but the fact that **these storms are absolutely being manipulated and steered is inarguable**. The denial of this fact is absolutely ludicrous at this point.

We know the U.S. military and others around the globe, but U.S. military has been engaged in these operations since 1947, Project Cirrus. How far have they come since that point? So the cyclones are being kept weakened over water with manipulation of atmospheric pressure zones, and once they're near enough to the land-based network of frequency transmitters, the NEXRAD network, **they are steered, and that steering is incredibly inarguable** if we

look at the animation of the frequency transmissions and their interaction with the storm, in this case, Hurricane Helene. We recorded that, and that video, if we can roll that now, the interaction is absolutely inarguable.

Man speaking from video being shown:

"[Is this the] result of natural processes and climate patterns, or was it manipulated? The circular blue flashes seen in this video are frequency transmissions from the NEXRAD network of transmitter installations. All available science evidence makes clear that **atmospheric frequency transmissions can and do have a repelling effect on air masses, especially if and when the air masses have been seeded with electrically conductive nanoparticles.**

The brighter the blue flash from a frequency transmission installation, the more pronounced and powerful the repelling effect on any air mass or storm in the vicinity will be. Where there are no blue flashes, there is no transmission, thus no repelling effect, thus no resistance for a migrating storm. Translation: A migrating storm will be hindered from moving toward frequency transmissions and will easily migrate in a direction with no transmissions.

So again, I ask, was Hurricane Helene's path and behavior just an act of nature, or was it engineered? You decide."

Douglas Macgregor: Well, Dane, the question here is, how does this hurricane's path differ from others that we've seen? I've already had a lot of people call me from the Asheville area talk specifically about the horrendous damage, and many of them pointed out that that is not Hurricane Alley, per se. It's not an area that normally attracts storms. Can you help us understand this?

Dane Wigington: Well, the bottom line is it was directed there, as the transmission recordings clearly show. They kept that moisture corralled there to deluge in the same location. So again, these are patented technologies, and the fact that we have entire so-called meteorological community denying that this is going on to protect their paychecks and pensions is absolutely criminal at this point.

We know we have private defense contractors that are neck deep in the patents that manipulate these storms, Raytheon, Lockheed Martin. We know those two in particular do the weather modeling for the nation's weatherman, National Weather Service and NOAA. Again, **both agencies have an illegal federal gag order on them.**

So at this point, this is an emperor has no clothes moment. That's the best description I can give for something that is so blatantly obvious and inarguable, **can only be considered weather warfare at this point.** And the fact that, again, the so-called science community is denying this manipulation is **criminal**, it's absolutely criminal, Colonel Macgregor.

Douglas Macgregor: Why do you think the Asheville area in particular turned out to be a target? Does it have anything to do with the mining operations there for lithium or quartz? Is that just coincidental? I'm just curious.

Again, people in Asheville are asking these questions. They're trying to find a rationale for why they ended up being in the middle of this.

Dane Wigington: Well, certainly it's hard to call anything a coincidence at this point, isn't it? I mean, we have so many agendas and objectives being carried out with every action of the military industrial complex and the money printer bankers that fund and control them ultimately. And we have a cyclonic rotation like this that does that kind of decimation inland. And yet we have in the record warm Gulf of Mexico, nothing develops, nothing spins or damages the oil infrastructure there. Why is that? We see any rotation that comes anywhere near the oil infrastructure is immediately broken up. Yet we have this type scenario happening inland.

So again, once you interfere with the climate system, the entire system becomes derailed. And we have a global network interfering with the system. We have documents at geoengineeringwatch.org, some hundreds of pages long, some nearly a thousand pages long, documenting the international cooperation in these programs, even between otherwise adversarial nations.

So again, they will try to hide and deny these programs until the last possible hour, Colonel Macgregor, because **if the public realizes the entire weather system has been derailed and is being manipulated and no weather cataclysm can then be said to be natural, which means that you can't deny the connection of climate engineering for any event anywhere, the liability issue is incalculable.**

And so again, even this one issue that just happened in the Carolinas, how could you possibly even calculate the liability issue there when hundreds of people are still missing? I believe a hundred already officially declared dead, but hundreds still missing. If this issue is brought out into the open, the fur is going to fly, Colonel Macgregor.

Douglas Macgregor: If you can do so, could you tell us about some of your recent discussions, conversations, briefings that you've had with political leaders from the states in question that have asked you what you think? First of all, what did they specifically ask you, if you can tell us, and how did they respond to your answers?

Dane Wigington: Yes, Colonel Macgregor. I had an hour conference call yesterday with the representatives and senators from the Carolinas, and we presented the data to them to answer their questions about how this manipulation occurs. They realized this was not a natural event. They're trying to digest the fact that **their states were literally under assault from weather modification operations that are clearly connected with DOD operations**, and we can speculate again on the agendas and objectives being carried out, but the fact that the storm was manipulated is absolutely inarguable.

We know that technology to stop these rotations from even occurring has existed for decades with the manipulation of atmospheric pressure zones. HAARP in Alaska is one example many people are familiar with. That's an ionosphere heater. That's a weapon of mass destruction, period. It can cause

an electrical chain reaction in the ionosphere, which heats it to extraordinarily high temperatures, which causes the atmosphere to bulge up and down. The downward push creates a high-pressure dome that can steer the jet stream, and the same type of manipulation can create low-pressure zones.

When they have this type of power over the climate system, they can make or break these storms anytime they want, and again, what we see now is storms kept weaker as they're over the ocean because they're harder to steer until they reach the land-based network of transmitters, and then we have, Colonel Macgregor, rapid intensification. You've heard that term probably a lot lately because that's how they manipulate these storms, and again, we have Acapulco last October being the extreme example of rapid intensification. An insignificant low-pressure system developed into the strongest Cat 5 hurricane to ever hit that part of the world in less than 24 hours laid waste to Acapulco. And by the way, Hurricane John, which just hit Acapulco again as Hurricane Helene was wreaking havoc in the Carolinas. Not many people know that, so Acapulco just got dealt another blow.

So again, how many agendas and objectives are being carried out when we know they can manipulate these storms and we know they can make or break them anytime they want. And again, I bring up the oil infrastructure in the Gulf of Mexico that seems to magically miss any sort of damaging storm again and again and again while the storms wreak havoc inland and on shorelines. It's not a coincidence. They have that much sway over the storms.

Douglas Macgregor: Well, when you highlighted these anomalies to the audience of political leaders and representatives and so forth, how did they react? Did they react with a degree of serious skepticism, or did they take you seriously?

Dane Wigington: They're in shock. They're in shock, because when you realize that you're literally at war with those who control the federal government, how does one digest that? And when we go all the way back to, again, as I've referenced many times, 1962, 62 years ago, Lyndon Johnson, President Johnson, then stating we had the power to control the world's cloud layer and he who controls the weather controls the world, we're seeing this happen all over the globe. We're seeing countries like **Dubai, as you remember recently, got two years worth of rain, two years worth in six hours, right after they decide to ditch the dollar.** Is that a coincidence? We see this kind of event over and over.

So climate engineering is the crown jewel weapon of the military-industrial complex, because **they can and are bringing populations to their knees without those populations ever even knowing they're under assault, and they blame it on nature.** That's why this is such a coveted weapon, and they're not about to give it up, even though it's destroying the ozone layer, contaminating the entire planet.

Every breath we take is contaminated with climate engineering fallout. Part of that is nanoplastics. Anyone who looks, I challenge your listeners to look, nanoplastic contamination, human organs, we know it's showing up in the brain, all of our organs, and we know there's decomposing plastics in the

environment, we're not denying that. But when you have this type of ubiquitous contamination of nanoplastics that appears to be a manufactured particle, that's not just decomposing plastics.

So again, this assault is not just environmental, it's a contamination of virtually the entire planet and all of us.

Douglas Macgregor: Well, you paint a very grim and frightening picture, and I'm sure that's necessary to get people's attention. Now that you have people's attention and you're talking to an audience inside [Our Country, Our Choice](#), but also this will eventually go out to others, what do you want American citizens to do who are listening to you right now? What do you recommend that they do?

Dane Wigington: I'm asking them to behave as if they're fighting for their lives, because they are. And I can't take the long way around the barn with this. Too many people want to pretend there's some happy ending if we just take a few meager steps in a particular direction or post something on a blog somewhere. We have to absolutely bring this issue out into the full light of day. That's the only chance we have of stopping it from the inside out, so that those participating, and this is so very key, our military brothers and sisters and defense industry families and participants there, so they understand that they're participating in their own near-term demise. We have to push this issue out into the full light of day, Colonel Macgregor.

And this issue is connected to so many other lethal immediate threats. For example, the disintegrating ozone layer, we are getting UVC on the surface now. That's the last spectrum of UV radiation before x-ray.

Climate engineering is the core causal factor, not just the sprayed particulates, which cause an oxidative effect on the ozone layer disintegrating it, but the frequency transmissions that are being used, just like you saw with Hurricane Helene, all of this destroying the ozone layer. Now we're susceptible to a CME, a Coronal Mass Ejection, because we don't have the atmospheric protection. Not only is it frying plants, foliage, insects, plankton, but we're susceptible to a large coronal mass ejection, which would shut down grid power around the globe, which would cause nuclear power plants to not be able to cool themselves. And now we have Fukushima times 100 or 200. So from every conceivable direction, what's happening in our skies holds all of our futures in the near-term balance.

Douglas Macgregor: Well, soldiers, sailors, airmen, and Marines know from experience, it's one thing to ask questions and urge action, but it's another to put yourself at severe risk. And unfortunately for them, those of us in uniform right now, they're going to look at this and they're going to say, well, it makes sense to me, but what kind of a response am I going to elicit from the chain of command? And historically, the chain of command usually answers, shut up, get back to work. There's not a problem. If there is, we'll let you know.

So what about the rest of us, those of us who are not in the active military? What do you want them to do? Can they write congressmen, contact congressmen,

senators? How do you want them to go forward with this?

Dane Wigington: Yes, to start spot fires of awareness. And we have tried to provide those tools at geoengineeringwatch.org. Our groundbreaking documentary, [The Dimming](#), which includes two US Air Force generals testifying that these programs are real and ongoing, former Canadian minister of defense, former US presidential cabinet members, and former government scientists. That film is the best one-stop tool to introduce this issue. And that link can be emailed to all of the above. All that you just mentioned, elected officials, environmental groups, farm groups, organizations, the list is endless to start a spot fire of awareness.

And in spite of draconian social media censorship, our film, [The Dimming](#), is now over 25 million views. People are waking up to this.

And again, our printed materials help as well. We pass those on, by the way, for less than our cost of producing and shipping. Our only goal, my only goal is to see this nightmare in our skies exposed fully once and for all and brought to a halt so that the planet can respond on its own to the damage done and not continue to sink with this toxic straitjacket of climate engineering.

How many blue skies do you see, Colonel Macgregor? Do you see any where you're at? Because we don't see any true blue skies here at best it's silvery white.

Douglas Macgregor: Well, I see some blue skies occasionally, but admittedly, lately, we haven't had much. But that I attribute to the rain.

Look, this strikes me as an issue that should spread like wildfire on this new platform, social media platform that we have been urging our members to join called Republic. Because Republic is designed under no circumstances to be censored or canceled. In other words, it is a true free speech platform.

(Note from James: I can't find the link to Republic. If anyone knows, please write it in the comments section.)

And if you pay to be on it, then you're free to explore, to speak, to write, to display whatever you think is important for your community. And this is the kind of thing that really needs to reach people at the lowest level in every community, because that's where the change has to come from. Those are the people that can hold people accountable that are either appointed or elected to office.

So I hope people will do that. And we'll make that information available to them after this video. And I hope that we get all of the material that you've been discussing on that platform. It's very important.

Dane, thank you so much for being with us today. Continue to have God's blessing in the work that you're doing and be successful in the future. Thank you.

Dane Wigington: Thank you, Colonel Macgregor. And I stress to your listeners,

your viewers, that there is no place to hide from what's taking place in our skies. Every breath we take, every bite of food, every drink of water, all of it is absorbing the contamination from what they're doing in our skies. And it's affecting the planet's ability to grow crops, forests, fisheries. They're all collapsing. Many causal factors. We've been bad stewards of the planet, but there's nothing that compares with what they're doing intentionally in our skies. So thank you and your staff and your platform for helping us to sound the alarm.

Douglas Macgregor: Sure. Thanks again, Dane. And that's it from [Our Country Our Choice](#). And you heard the man. It's up to you. No one is going to rescue us. We have to act. Thanks so much. Bye-bye.

I've known about chemtrails from around 1999. Here's an article I posted in 2002:

[Chemtrails in Japan.](#)

That day was unusual for the amount of chemtrails. They were not something that occurred frequently in the area I lived in Japan, Niigata. My friend Patty in Kansas told me once her sky is always gray due to chemtrails! That's sad. I had plenty of blue sky days in Japan. The 5 years I lived on Guam there were no chemtrails, and there are none here in the sky of Northern

Samar, the Philippines. I'm sorry for my friends in America who have had to endure them. Maybe this article will inspire you to complain louder to your local elected officials to have the government stop it!

[Testimonials from Survivors of Hurricane Helene that Refute the Mainstream Media and the Government](#)

My wife Tess found this on YouTube and shared it with me this morning. It's shocking testimonies from people in the areas where Hurricane Helene did considerable property damage and caused loss of life, up to **one hundred times more** than what's being reported by the mainstream media according to one witness in the area!

The title of the YouTube implies Hurricane Helene was an act of war against the American public! If that is true, the same can be said of Hurricane Milton.

Transcript of Hurricane Helene Is 5th Generation Warfare!:

Man who created this video: Before I start this video, I want to explain something to you. I had to get a crappy motel room because I had to make this video because this video is important. **We are in the middle of a war right now** and I'm going to prove this to you and show you all the receipts. Whether you decide to accept it or deny it is completely up to you. But **everybody that has a platform** (I was told this website is my platform) should be putting this information out because an entire town, all of its people have been decimated and abandoned by the government. Not only has the government turned its back on them, but the government that is there is trying to stop all the citizens from helping each other.

That's a little bit of overreach right there and it's going to get even worse. So here we go. If you've got a platform, you should be shining a light on this right now because the national news is not.

Here we go.

Testimonial from lady #1: We picked up a flight of pediatric medical supplies that were brought in and are going to North Asheville. We were sitting in the private portion of the airport and we got to overhear an awful lot.

The army pilots, the navy pilots, hospital representatives, there was a lot of chatter. While we were there, a private jet landed and four FEMA representatives got off. Four, four people off of a private jet.

Come to find out, and you're not going to hear this (implying we won't hear it from the mainstream media), so let me tell you. Come to find out Mission Hospital was told, a private hospital, that they are going to go ahead and be the morgue center for body recovery. All of the army Chinook helicopters you see flying overhead, they are doing body recovery.

FEMA said, and you can take this as a direct quote, that they are "too tied up at *the border* to send any more representatives. Yeah, at the border. So anyhow, I guess border control trumps whatever is going on here.

So they told Mission Hospital they are not sending refrigerated trucks so that they can stack the bodies up. And we also overheard that **whatever fatality numbers you are hearing**, and this is a quote, "go ahead and **add a couple of zeros.**"

So FEMA's too busy with the border. A private hospital and the army are going to take over body recovery. And private individuals with their private helicopters and their private planes are the ones who are flying in supplies.

I was at hangar 10, I was picking up supplies. There was a stack for the [Cajun Navy](#). There was a stack that looked like it was ASPCA. These are all being sent by private individuals. **FEMA is doing nothing.** Go ahead and share that.

Testimonial from lady #2: (Inaudible) left their home and came back the next day and found, they had 15 cats, five dogs, and a father-in-law. And found them all dead except for four cats. And the story was hard to hear. (She's crying.) But it's the look in her eyes that I can't, I can't forget.

Last night, somebody was at the river and just looking at the destruction and cars upside down. And she saw Halloween costumes floating down a river. And then she saw faces and realized they weren't costumes.

And she said, I've seen bodies and I'm not okay with that. And then somebody called and said, when is somebody gonna come collect all the bodies that have piled up along the embankment of the river? And then a man called saying that I need 911 at my house. And somebody said, why, are you okay? And he said, yes, I'm okay. But I opened my front door and there are several bodies in my front yard.

Man #1: You deserve to hear this. I'm a truck driver, all right? I have a 53 foot step deck. I've been trucking for about two and a half years. I have a YouTube channel. You can verify that on [Baby Lion Hotshot](#).

Usually in a disaster situation, it is payday for truckers. We look for that hurricane. We look for that ice storm. There are generators coming to you. There's stuff coming out of military bases. There are excavators, skid steers, bulldozers, tree trimming equipment, and pumps, like water pumps to pump water out of places that have been flooded.

There are no loads on the load board coming to you within 125 miles of Asheville! It's called truck stop. This is where I find all my loads.

Chicago, Illinois, up at the top, within 250 miles of Chicago is where I'm gonna pick up. The second is the destination. So it goes origin, destination, watch.

See, the drop-off location. Let's do city. North Carolina, click it, boom.

All right. These are all \$1.40 a mile loads, \$1.39. That was posted yesterday. I mean, there's nothing. There's nothing. These are loads that you wouldn't even, nobody's taking them. They're just on the load board. They've been on there since yesterday. You can see, right?

Let's type in a different city. That's from Chicago. Maybe Tennessee, maybe Nashville is closer and they'd send resources from Nashville, Tennessee. Nashville, Tennessee, within 250 miles of Nashville to Asheville, North Carolina, within 125 miles. Let's see, there is, that's it. That's all the loads (implying not many. That's all the loads that are 28,000 pounds in load.

Man #2: I'm not a conspiracy theorist, but I mean, what the hell's going on here? I had brokers call me and tell me, Stu, have you seen any loads going to Asheville or like anywhere around the Carolinas, South Carolina, Georgia? **Is there any like FEMA loads? There's none, zero!** He's been a broker for six years and he is talking to other brokers. They're saying the same thing.

Man #3: Good morning, it's Wednesday after Helene here in North Carolina, just South of Asheville. And I still have no power and no water. I have occasional cell signal and I've got my Starlink.

I wanted to take a few moments to discuss some things that I've seen online and through the press that I find bothersome, because my experience here on the ground is different than the experience that's being espoused by our leaders.

Immediately after the storm, I was able to use my cell phone. I have one of those. And it told me that there were open routes out of the Asheville area all the way to Charlotte. Monday, I was able to drive down to South Carolina, just fine, thank you very much. I was able to gas up and get some food. On Saturday, I was able to get into Asheville.

I have a two-wheel drive vehicle. I do not possess helicopters or giant military bulldozers or bridge layers, just a two-wheel drive vehicle. And I got into Asheville. It took me six hours. I had to care because I was going in to help people. I'm not quite sure how a government that has the biggest military on the planet can't figure it out.

I'm not quite sure why that same government that has all the information-gathering techniques that it has and satellites, **is telling people there's still no way to get into the area.**

Up to 9 minutes of the video has been transcribed. The next part is something you can only know from seeing it.

[Is the Extreme Weather in America Purposely Created by Technology to Blame it on Climate Change And Tax The Public for CO² Emissions?](#)

Documentation that provides undeniable proof that man has the power to manipulate the weather either for the benefit or harm of the public.

[The Inventors of the Climate Change Scam: The Club of Rome](#)

What is the Club of Rome?

"The Club of Rome is a platform of diverse thought leaders who identify holistic solutions to complex global issues and promote policy initiatives and action to enable humanity to emerge from multiple planetary emergencies." (Source: <https://www.clubofrome.org/about-us/> – on the official website of the Club of Rome)

"The Club of Rome is a **Masonic lodge founded in 1968 on David Rockefeller's estate** in Bellagio, Italy. The Member Squadron is a traditional collection of grandiose reformers with heads of state, UN bureaucrats, leading politicians and government officials, diplomats, scientists, economists and big business leaders. **A collection from all over the world with a strong side of rich Western "elite"**. This political lodge also brings together multi-billionaires in the Rockefeller, Rothschild and Soros families along with political chameleons such as Anders Wijkman and industrial magnates such as the now deceased oil businessman Maurice Strong." (Source: [Club Of Rome: The Origin Of Climate And Population Alarmism](#))

The second definition is from Technocracy News which mediabiasfactcheck.com calls "Conspiracy-Pseudoscience." LOL!

I fact-checked mediabiasfactcheck.com and this is what I came up with:

"Mediabiasfactcheck has been repeatedly caught in lies and distortion of truth. Repeated claims that have proven false about Covid alone are enough to quit using them. Takes going to court to get them to correct lies they publish. It is a totally discredited, self-styled 'fact-checker' site that has been served with a 'cease and desist' legal notice for publishing unsubstantiated and defamatory claims against Principia Scientific International (PSI)." (Source: <https://www.sitejabber.com/reviews/mediabiasfactcheck.com>)

David Icke and Dr. John Coleman talk a lot about the Club of Rome, but because I don't trust information from either of those guys, I won't use any

of their materials. Coleman talked about the Club of Rome as a governing body giving orders, but I see it more as a think tank.

I consider the most reliable source of information about globalists' plans that do not have the good of the general public in mind to be right out of publications of the globalists themselves. The following quotes are from a PDF file of a Club of Rome publication entitled: "[The First Global Revolution – A Report by the Council of the Club of Rome](#) written in 1991 by Alexander King and Bertrand Schneider. You can click the link to download the PDF file.

Quotes from the publication of the Council of the Club of Rome

From page 108 of [the PDF file](#):

The need for enemies seems to be a common historical factor. States have striven to overcome domestic failure and internal contradictions by designating external enemies. The scapegoat practice is as old as mankind itself. When things become too difficult at home, divert attention by adventure abroad. Bring the divided nation together to face an outside enemy, **either a real one or else one invented for the purpose.**

From page 115 of [the PDF file](#):

The Common Enemy of Humanity Is Man

□

In searching for a new enemy to unite us, **we came □up with the idea** that pollution, the threat of global □warming (now called climate change), water shortages, famine and the like **would □fit the bill.** In their totality and in their interactions □these phenomena do constitute a common threat which demands the solidarity of all peoples.

Climate change is controversial even among scientists, but you probably didn't know that by listening to the mainstream media. One of my friends was surprised when I called Climate Change a scam and offered evidence from a scientist, Dr. John G. Hartnett, from his website. Please see [Climate change study on coral reef fish was '100 per cent wrong'](#)

Researching controversial organizations and topics such as the Club of Rome and Climate Change requires spiritual discernment, and that comes from knowing the written Word of God in the Bible and a good relationship with God through obedience to the Lord Jesus Christ.

Proverbs 1:7 The fear of the LORD is the beginning of knowledge:..

Also see: [Elitists have created the myth of climate change to eliminate national sovereignty](#)

God's Promise to Abraham in Genesis 12:3 is Misinterpreted by Zionists to Promote Genocide

The misunderstanding of God's promise to Abraham in Genesis 12:3 has led to the murder of innocent Palestinians in Gaza.

Pope Francis The Fox

Pope Francis is first and foremost a Jesuit. As a Jesuit, he is known to be cunning as a fox. He believes in his absolute authority.

Carbon Dioxide is Not a Pollutant!

In light of the current (30 November until 12 December 2023) United Nations Climate Change Conference in UAE, also known as COP 28, I feel led by the Lord to write something about the so-called climate change crisis. COP stands for Conference Of the Parties under the UN Framework Convention on Climate Change (UNFCCC). In case you don't know it, the UN is not our friend.

Christiana Figueres, the Executive Secretary of the UNFCCC, stated in an interview that the Earth is already overburdened with people and that we should look at depopulating the planet.

She also said: (Quotes from https://www.azquotes.com/author/32264-Christiana_Figueres)

We have to get to the point where each individual, each corporation, each community chooses low carbon, because it makes fundamental sense. It should become a no-brainer.

DEMAND, PURCHASE & USE LOW CARBON PRODUCTS AND SERVICES. MAKE LOW CARBON SEXY!

The transition to a low-carbon economy will be much more painful if we wait until there is a climate crisis before recognizing that more than half of the world's fossil fuel reserves will have to remain in the ground.

Based on the many things I have heard over the years, the real reason behind the agenda of limiting carbon dioxide into the air is to purposely hurt the economy by increasing the cost of energy. Low-cost energy creates a strong middle-class economy, and this is what the New World Order elite do not want. The middle class has, from the elite's perspective, too much time to think! Rational thinking leads to awareness of government corruption and abuse of civil rights which results in public protests, something no government wants.

Christiana Figueres confirmed this view by actually admitting that the goal of environmental activists is not to save the world from ecological calamity but **to destroy capitalism!**

"This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for at least 150 years, since the Industrial Revolution."

The middle class in England grew as a result of the Industrial Revolution which began in the late 18th century.

As a group, the middle class saw enormous benefits from the industrial revolution. The growth of new businesses and factories created thousands of new jobs. The middle class itself grew in size as occupations like merchants, shopkeepers and accountants allowed the working class to lift themselves into a higher social strata. – Source:

<https://www.theclassroom.com/differences-between-wealthy-middle-class-poor-industrial-revolution-17180.html>

The Industrial Revolution created great wealth in England through the manufacture and sale of goods. Factories need a lot of energy to operate and that energy came from the low cost petroleum of that time, what the elite call “fossil fuel.” Fuel made from crude petroleum wasn’t taxed then as it is today. It turns out that the [origin of petroleum may be abiogenic](#) and not from fossils of decayed organic matter! If so, it may be limitless and the price could go down drastically. But that’s not what the ruling elite want to happen.

Bill Gates in an interview stated his ambitious goal is for the world to decrease CO₂ to zero by year 2050. In the meantime he confesses to being an ‘imperfect messenger’ as he lives in large houses and travels by private jet. [He owns four of them](#) which he used for 392 flights last year, more than once per day!

The climate may be changing but it’s not the result of CO₂ emissions. It’s either natural as a result of solar activity and/or it could be [malicious weather modification, something the US military learned how to do during the Vietnam War](#).

Quote from [There Is No Climate Emergency, Say 500 Experts in Letter to the United Nations](#)

On the same day last week that Greta Thunberg made an impassioned speech to the United Nations about her fears of a climate emergency, a group of 500 prominent scientists and professionals, led by the CLINTEL (Climate Intelligence) co-founder Guus Berkhout, sent this registered letter to the United Nations Secretary-General stating that there is no climate emergency and climate policies should be designed to benefit the lives of people.

The made points in the letter are [listed on CLINTEL’s website](#):

There is no climate emergency

A global network of over 1800 scientists and professionals has prepared this urgent message. Climate science should be less political, while climate policies should be more scientific. Scientists should openly address uncertainties and exaggerations in their predictions of global warming, while politicians should dispassionately count the real costs as well as the

imagined benefits of their policy measures.

Natural as well as anthropogenic (caused by humans) factors cause warming

The geological archive reveals that Earth's climate has varied as long as the planet has existed, with natural cold and warm phases. The Little Ice Age ended as recently as 1850. Therefore, it is no surprise that we now are experiencing a period of warming.

Warming is far slower than predicted

The world has warmed significantly less than predicted by IPCC ([The Intergovernmental Panel on Climate Change](#)) on the basis of modeled anthropogenic forcing. The gap between the real world and the modeled world tells us that we are far from understanding climate change.

Climate policy relies on inadequate models

Climate models have many shortcomings and are not remotely plausible as global policy tools. They blow up the effect of greenhouse gases such as CO₂. In addition, they ignore the fact that enriching the atmosphere with CO₂ is beneficial.

CO₂ is plant food, the basis of all life on Earth

CO₂ is not a pollutant. It is essential to all life on Earth. Photosynthesis is a blessing. More CO₂ is beneficial for nature, greening the Earth: additional CO₂ in the air has promoted growth in global plant biomass. It is also good for agriculture, increasing the yields of crops worldwide.

Global warming has not increased natural disasters.

There is no statistical evidence that global warming is intensifying hurricanes, floods, droughts and suchlike natural disasters, or making them more frequent. However, there is ample evidence that CO₂-mitigation measures are as damaging as they are costly.

Climate policy must respect scientific and economic realities

There is no climate emergency. Therefore, there is no cause for panic and alarm. We strongly oppose the harmful and unrealistic net-zero CO₂ policy proposed for 2050. If better approaches emerge, and they certainly will, we have ample time to reflect and re-adapt. The aim of global policy should be 'prosperity for all' by providing reliable and affordable energy at all times. In a prosperous society men and women are well educated, birthrates are low and people care about their environment.

Those are statements from honest scientists!

I have a scientist friend, Dr. John Gideon Hartnett, who also exposes the UN Climate Change policies as a scam. The following facts are from his Bible Science Forum website: [Decarbonise the planet, are they mad?](#)

The lie that sits beneath the climate change movement is that there is excess carbon dioxide in the atmosphere. Who says and by what definition? There is no climate catastrophe – some have even called the ideology a total fraud. But there is plenty of money to be made and so Big Oil backs these schemes to suck the life out of the planet.

How deluded do you need to be? Carbon dioxide is not a pollutant. It's **plant food**. It is essential to life, all life (directly or indirectly), yeah, except for maybe some deep sea worms, and anaerobic bacteria.

There are four essential ingredients for green plants to grow and produce oxygen and sugars. The sugars are the food for animals and humans. The sugars in grasses are what the herbivores (animals like cows and sheep) convert into protein, which we need as a species to survive. And carnivores eat the herbivores, thus all species are included.

Those four essential ingredients are **sunlight, carbon dioxide, water and minerals**, especially magnesium. Sunlight, carbon dioxide, and water – atmospheric molecules – are all demonized as greenhouse gases causing global warming. In addition, nitrogen, another atmospheric molecule, an essential plant fertilizer, is also considered pollution.

NASA says the earth is getting greener as a result of more CO₂ emissions!

A quarter to **half of Earth's vegetated lands has shown significant greening over the last 35 years** largely due to rising levels of atmospheric carbon dioxide, according to a new study published in the journal Nature Climate Change on April 25.

An international team of 32 authors from 24 institutions in eight countries led the effort, which involved using satellite data from NASA's Moderate Resolution Imaging Spectrometer and the National Oceanic and Atmospheric Administration's Advanced Very High Resolution Radiometer instruments to help determine the leaf area index, or amount of leaf cover, over the planet's vegetated regions. The greening represents an increase in leaves on plants and trees equivalent in area to two times the continental United States.

Green leaves use energy from sunlight through photosynthesis to chemically combine carbon dioxide drawn in from the air with water and nutrients tapped from the ground to produce sugars, which are the main source of food, fiber and fuel for life on Earth. Studies have shown that **increased concentrations of carbon dioxide increase photosynthesis, spurring plant growth.**

What does that mean in relation to the United Nations climate change agenda? It means to me purposely decreasing the amount of carbon dioxide into the air will *decrease* plant growth! There's even talk about cutting down carbon dioxide in the air by [capturing it to permanently storing it underground!](#) Utter madness!

All Christians should pray against COP 28.

Whenever there is worldwide deception, we know Satan is behind it for the Bible says:

Revelation 20:7-8 And when the thousand years are expired, Satan shall be loosed out of his prison, And shall go out to **deceive the nations** which are in the four quarters of the earth,...

[The Fatalism of Dispensationalism](#)

We don't have to accept the abuses of our constitutional liberties! We can pray that the Lord will defeat any government policy that is against our morals.

[Climate Change & The New World Order](#)

The UN and Vatican are pushing the climate change scam to help bring about their new world order of global governance – no more God-given rights, only government “privileges.”

[What exactly is the World Economic](#)

Forum?

I found a talk by Larry Alex Taunton that I like on my friend's website [Global Depopulation by WEF](#)

Mr. Taunton has very interesting things to say about Klaus Schwab's World Economic Forum. He gives the history and the motivation behind it.

Larry Alex Taunton (born, May 24, 1967) is an American author, columnist, and cultural commentator. He has personally engaged some of the most outspoken opponents of Christianity, including Richard Dawkins, Christopher Hitchens, and Peter Singer.

Quoted from the YouTube video:

In this, our fourth episode of the "Ideas Have Consequences" podcast, author and host Larry Alex Taunton cuts through the conspiracy theories and the WEF's noble slogans to explain the history of this sinister organization and the anti-human ideas driving it. Taunton, who attended the WEF's annual meeting in Davos, Switzerland as a kind of spy, brings a unique knowledge and experience to this important issue. This is THE podcast when it comes to ideas and the World Economic Forum.

Important points from the video

- The elite are telling us all how we need to reduce our carbon footprint. The carbon they want to reduce is you.
- There are a boatload of ideas that are driving the World Economic Forum. They are sinister ideas but the people themselves don't think of themselves as sinister. Indeed they think of themselves as very decent good people who are doing what is the best for humanity.
- C.S Lewis once made the observation that the worst kind of tyranny is that which is done for your own good. And it's because those kind of tyrants are individuals who tyrannize you with the approval of their consciences. They're individuals who reassure themselves that at the end of the day what they're doing even if it caused a little bit of harm, it was ultimately for your own good. It's why a guy like Joseph Stalin when asked by a lady, "When are you going to stop killing people? He said, "When it's no longer necessary." He simply meant, to make the Socialist,

the Stalinist, the Marxist omelet, you got to break a few eggs. And this is the mentality of the World Economic Forum.

- Human beings in the Socialist, Marxist, Communist, and Fascist way of thinking are simply raw materials for building the Utopian state, and this defines the World Economic Forum as well.
- Atheism is a major driving factor.
- The guys that are coming after you, they're not going to have gone to Sunday school, they're not going to be people who have been influenced to the degree that you are by the Christian faith. They're going to be prepared to follow their atheism to its logical conclusions. They're like Peter Singer (Australian moral philosopher and the Ira W. DeCamp Professor of Bioethics at Princeton University) who's the most consistent atheist that I've ever met. They're going to be willing to follow it all the way to where it goes which is to say there's no ultimate meaning in life other than that which you assign to yourself which again has no real meaning, no transcendent meaning. It's just kind of a fake meaning that you give yourself in order to feel better about this life. It means there's no life in the Hereafter, there's no hope, there's no justice, there's no ultimate right and wrong, there is only what happens. And if it means that you're a genocidal maniac, who cares? There's no ultimate right and wrong. And it means a guy like Stalin or Mao got away with it. There's no one in the next life to judge them for what they did. (Or so they think!) Once a culture absorbs that kind of ideology, atheism at its core, it's anything goes. And we're starting to see that in the culture now.
- The World Economic Forum has moved beyond the debate over God's existence to a place where their whole premise, their whole world view just more or less assumes there is no God. And they're taking it to the next level, they're taking it to its logical conclusion.
- At its core the World Economic Forum is about population control. They want to reduce the global population.
- They use the word "sustainability." That is a word you should be very wary of any time you hear sustainability, economic sustainability, development sustainability, governmental sustainability, or agricultural sustainability. Nothing good follows on the backside of the word sustainability. It always turns out to be fundamentally anti-human and that is because the World Economic Forum is anti-human. Atheism taken to its logical conclusions is anti-human.
- A lot of these World Economic Forum types don't believe in human perfectibility. They believe in societal perfectibility. There's a slight difference between those two. They recognize that human beings are flawed but they they think they're flawed for a different reason. They don't think it is because of the Fall as I believe as a Christian from the Genesis account of creation and the polluting of the human spirit from Adam all the way down.
- I remember how Richard Dawkins put this to me in his home some years ago. I said, "Do you believe in evil?" And he says, "I believe in genetic predispositions." So he's rejecting the premise that there's an ultimate right and wrong, there are only genetic predispositions, and those pre-dispositions are divided into two categories, those dispositions that we like and those dispositions that we don't like,

that we consider to be anti-social and therefore things to be eradicated. That's an evil philosophy because it leads you to believe that we can separate out the evil people and destroy them and we're left off with a better humanity. This is what drove Hitler, just separate out the bad people and destroy them.

- The World Economic Forum itself was founded in 1971. Between 1965 and 1975 there was an obsession with the global population, that the population was getting out of control.
- This concern over population control had infected the thinking of academic elites, and so they were buying into this in a big way, and the Club of Rome comes along. This is a group that was established in Rome which oddly now is based in Zurich. They should be called the Club of Zurich. It was a group of about 25 people the goal of it becoming about 60 people, but I think they're north of 100 members now. They're mostly individuals who are think-tankish types. They are academics, they're businessmen, they are influential people who gather together for the purpose of bettering mankind. That's the stated goal of the Club of Rome. It's a think tank, a vastly influential think tank.
- The club of Rome was saying, "Look we have a global crisis and the global crisis is overpopulation. Read what Paul Ehrlich said in the *"Population Bomb."* We're in trouble what are we going to do?" So they said, "Rather than doing what academics normally do and just producing a paper that's full of theories and suggestions, let's actually create an executive committee that acts on their recommendations of the think tank. We need to create the problem: Overpopulation."
- Klaus Schwab, a German engineer, founded what he called at the time the World Forum. He would eventually change the name to the World Economic Forum. The World Economic Forum was created with the intention that it would act upon the think tank's (the Club of Rome's) recommendations.
- You have to think about this just a little bit how arrogant must you be to think that it is your job to act on behalf of the whole of humanity without being elected to so much as dog catcher! These are not elected individuals. At the time of its founding, the World Economic Forum wasn't particularly influential. Now it is.
- This year's World Economic Forum there were more than 50 heads of state, 115 billionaires and more than 600 CEOs of major corporations. Major multi-billion dollar corporations that are involved in this. And then there are peons like me who attended which are another 2700 individuals. And so I decided I needed to be there. I wanted to mingle among the 2700 others. I wanted to see what those people are about.
- Dennis Meadows (American scientist and Club of Rome member) is here saying, "Yeah, we need to reduce the global population by billions, but hey I really hope this can be done in a civil way, in a peaceful way." It's astonishing the way these people talk about peace. It doesn't mean that everybody's happy, but it means that conflict isn't solved through violence and through force but rather in other ways.
- Dennis Meadows comes off as just your regular normal guy who lives next door and who you discover wants to rid the planet of seven billion people. Here's a guy who says, "Gosh I sure hope that we can do it in a sustainable way." And then you hear the absolute contempt for democracy, for the will of the people. This is the way these people think. They do

not believe that you deserve a voice in this.

- We have Marxist regimes in South America that are destroying economies. We have seen Brazil fall to Marxists via dubious means Venezuela fell to Marxists, Peru has fallen to Marxists, Chile has fallen to Marxists. Stunningly the most stable democracy in South America has fallen to Marxists and Honduras, all of those countries have fallen. Colombia is another one that has also fallen to Marxists, and they're destroying economies and those people are fleeing to the USA. Do you know what CNN said the reason was for these millions of people crossing our southern border? CNN said it was due to climate change! Complete nonsense! This has nothing to do with climate change. It has everything to do with the very policies that these people (the WEF elite) are trying to import into the United States.
- World Economic Forum agenda is fundamentally anti-human. It is anti-Christian. It is atheistic to its core.

[The Pope, the Catholic Church, and Pedophilia](#)

The Catholic doctrine of keeping the sacraments does not give you grace to live a moral life. Catholic priests are often more immoral than the average Catholic!

[Flat Earth Theory Totally Trashed](#)

Flat earth is cognitive infiltration to marginalize Bible-believing Christians!
