

Climate Change & The New World Order

The UN and Vatican are pushing the climate change scam to help bring about their new world order of global governance – no more God-given rights, only government “privileges.”

October 10, 2014 Hitchhike Adventure to Aomori

Mr. and Mrs. Suehiro who took me from Niigata Murakami City to Kisagata in Yamagata, a distance of 150 some kilometers

October 13, 2014: Today is the first day of a major change in my life. I returned home from my trip to Aomori prefecture to an empty house. My beloved spouse has gone to America to help her daughter's large family of 7 children. Our dog, Lady, was also not in the house but I retrieved her from the lady who is caring for her when I am not home, Yoneko san, whose business is to care for dogs when their master is out of town.

Now that I find myself with more time on my hands, I hope to be more regular

in writing about my experiences hitchhiking in Japan. I need to travel nearly every weekend some 400 kilometers up north.

October 10, 2014: It's was a cool Autumn day with a cloudy sky when I arrived at Majima Station on the Ouetsu Line at 7:40 a.m. The station is just 100 meters from Route 345, the road that runs along the Sea of Japan in Niigata Prefecture. The traffic is sparse. The drivers see the paper A4 size sign I am holding and drive on by. The sign says, TSURUOKA, nearly 100 kilometers further up the road, the next major city in Yamagata prefecture which is the neighboring prefecture just to the north of Niigata. Fukushima prefecture happens to be Niigata prefecture's neighbor to the east! FYI most of Fukushima is NOT the nuclear wasteland some people portray it to be. I have passed **many times** pass through Fukushima prefecture since the March 11, 2011, tsumami and nuclear power plant disaster. It's interesting that suddenly a large area of Japan named Fukushima gets the stigma of being a nuclear catastrophe like Chernobyl. Some people, even from the alternative media have called it, "worse than Chernobyl." How can the Fukushima nuclear power plant disaster be worse than Chernobyl when you consider only one person that worked at the Fukushima power plant after the disaster has died? And whether or not that person died as a result of nuclear radiation has *not* been validated!

I know without doubt the drivers of the vehicles passing by me take notice of both me and the paper sign I am holding. They all veer toward the middle of the road as if avoiding to hit me. Even if they didn't veer they wouldn't hit me because I am standing far enough away out of their path. The Japanese are taught to veer away from pedestrians when attending course in driver's school. The Japanese law has zero tolerance for drivers hitting pedestrians. That means even if a pedestrian purposely jumps in front of a vehicle, the driver is still at fault! You can now understand why a driver would take no chances. I wish they would implement such a law in Russia. The most dangerous thing to do in Russia is to walk across a road. The drivers won't even slow down and actually expect you to jump out of their way! I lived in Russia from March 1994 to October 1997 and know what I'm talking about.

It's sometimes a long wait to catch the first ride on Route 345. I have a beautiful view of the ocean which is on my right when turned around facing traffic. Seagulls often fly over my head to keep me entertained. The waves are sometimes choppy and water splashes from time to time all the way to the road where I stand. There is no traffic light to stop the cars but because the road is a lonely one I know from experience that drivers from other areas of Japan will stop for me when they see they are going as far as the sign says I want to go.

Today was such a case. After only a short 10 minute wait, Mr. & Mrs. Suehiro from Kanagawa Prefecture (the prefecture just southwest of Tokyo) stopped for me. They were going all the way to Akita Prefecture! This meant that they would be going past Tsuruoka in Yamagata prefecture and I would be able to skip Yamagata Prefecture entirely! They took me to the Kisagata road station in Akita.

After waiting 20 some minutes at Kisagata, Mr. Saitoh stopped for me. He said

he would go to Akita City, a good distance up the road of at least 60 kilometers. Unfortunately he let me off right in the middle of town, a place not well suited for hitchhiking. The traffic was heavy but most of the drivers are not going very far. I have experienced hitchhiking there before and knew I might not catch a ride at such a place, and so I walked backwards pulling my suitcase with wheels and held out the sign of my next destination, NOSHIRO, some 60 kilometers further up the road.

The time was now 12:30 p.m. There was a train leaving at 1:43 from from a train station, Tsuchizaki, which was few kilometers away. I thought I might have time to catch that train if I started walking to the station immediately, but after an hour walk I realized I wouldn't make it. I often walked backward with my thumb out hoping to catch a car, but it was fruitless. The traffic was going by too fast with not much room on the shoulder of the road for them to stop.

At 1:40 p.m. I arrived at the closest point to Tsuchizaki station though still standing next to Route 7. A teenage boy approached me asking if I have a problem.

"No problem," I replied, "I'm hitchhiking on my way to Aomori City."

"You don't have any money?" he inquired.

"I do."

I reached into my bag and handed him a Gospel tract which he received, and I shook his hand. Handshaking was not part of Japanese custom until fairly recently, say within the last 20 or so years. When I first came to Japan in 1972, I didn't like to shake hands with a Japanese person because they just didn't know how to do a good firm handshake. They do better now.

Though I missed the 1:43 p.m. train, I knew there would be another one around 2:30. I had plenty of time to catch it because the train station was now only a 10 minute walk. Around 2:00 a lady stopped for me and saved me the trouble of walking any further.

Mrs. Hanga

Her name is Mrs. Hanga. She is now the president of a construction company since her husband passed away a few years ago. Mrs. Hanga saw my sign that said NOSHIRO and told me she was going only part way, but it turned out that because she was going all the way to Takanosu which is past Noshiro by a different route, I told her I would be delighted if she would take me to Takanosu! It's much further down the road than I had hoped for.

As we approach Takanosu Mrs. Hanga pointed out the buildings that her company made. That included large stores.

Fukushima Radiation Reports Overblown

The fear mongers of the threat of radiation from the nuclear power plant meltdown were all wrong! Life goes on in Japan as it always had.

Joyce Riley of the Power Hour radio show: Hype, fear-mongering, disinformation and plain lies

Joyce Riley

A dear lady friend in the USA urged me to listen to hours 2 and 3 of the

March 27, 2012 Power Hour radio show broadcast hosted by Joyce Riley. She was afraid that I and my family were in **extreme and imminent danger** due to **nuclear radiation** contamination. She knows I live in an area that is neighbor to Fukushima Prefecture, Japan. After listening to what Joyce Riley and her callers were saying, I understood my friend's concern! Click on the audio arrow to hear 1 minute and 45 seconds of the Power Hour, hour 3 of March 27th.

[Joyce-Riley-The-Power-Hour-03-27-12-Hr-3](#)

If Joyce Riley were saying those things *last year March 2011* immediately after the Great East Japan Earthquake, I might think she was giving accurate information. But I think for her to make such claims *now* is nothing but pure lies and fear-mongering!

I knew I could disprove at least one of her statements immediately. I called a friend who lives near Misawa AFB in Aomori Prefecture. He has close contacts with military personnel on the base. He reports *no recent* increase of military personnel sending their dependants back to the USA! I visited Misawa city last year and months after the nuclear disaster in Fukushima. I saw little American kids with their parents at the Misawa city MacDonalds. Those children were of course dependants of US Air Force personnel stationed at the near by Misawa Air Base.

May 7 update:

Hirosaki Park May 5th, 2012. Misawa USAF personnel with dependents

The photo shows a man and his wife, their 3 children, and their 2 friends standing to the right and the left. The location of the photo is Hirosaki Park, Hirosaki City in Aomori Prefecture. The 3 men are USAF personnel from Misawa Air Force base in Aomori Prefecture. The lady and the 3 children are the dependents of one of the men, obviously the man holding the baby. This is positive visual proof for you that Joyce Riley was lying!!

When walking through Hirosaki Park last Saturday I saw *many* USAF people. I knew they were USAF because I was one of them at one time, and they were all young with short hair. The people in the photo confirmed to me that they are indeed from Misawa AFB and confirmed that there is **no recent sudden repatriation of US military dependents in Japan.**

Misawa is far more likely to get hit by radiation than my area of Niigata is because it is located northeast of Fukushima while I live west of Fukushima with a mountain range between me and the nuclear reactors. Also, wind blows from the west to the east in this part of Japan. There are no mountains to block radiation coming to Misawa from Fukushima. No repatriation of dependents means the USAF doesn't consider radiation a threat at this time.

The claim about chaos and overly congested Japanese airports is also false. A

young man I know flew from Tokyo International Airport (Narita) just a few days ago. He had no difficulty in getting and boarding a flight.

Moreover, if you are reading this 45 days from March 27, sometime past the middle of May 2012, and you haven't been hearing of nuclear radioactive contamination to the point of massive evacuations from Japan and people dying by the scores, you can be absolutely certain that Joyce Riley's program has no credibility whatsoever!

I smelled a rat as soon as I learned that the Power Hour is hosted on the **Genesis Communications Network (GCN)**, so called "alternative media" that also hosts [Alex Jones](#). GCN is affiliated with mainstream media **ABC** and ABC is owned by the *Walt Disney Company*! Whenever I think of ABC and especially Disney, I think of mind control, MK-ULTRA and disinformation. If you have a steady diet of either mainstream media or the compromised big name alternative media, and think you think for yourself and form your own opinions, think again. Those opinions were in all probability *given to you*.

[Attempt to hitchhike to the Fukushima Pacific coastline](#)

An attempt to visit the damaged nuclear power plants in Fukushima, Japan.

[Fukushima Fear Mongers Exposed](#)

Over the past few weeks well meaning relatives and friends have sent me articles on how to prepare for the radiation from the Fukushima power plant meltdown. Some people have sent me web articles with statements from “scientists” such as Leuren Moret, full of gloom and doom calling the meltdown, “tectonic nuclear warfare” against the USA! This is **total nonsense**, hype, fear mongering, and *disinformation*. I wonder whose payroll she is on?

For the record, I never once doubted that the Japanese are more than capable of handling the nuclear power plant disaster. I am proud to live in Japan among the most wonderful people in the world. They behaved so well in the face of disaster. They are clean, decent and for the most part, honest people. You cannot deceive an honest people for long, and the Japanese government is well aware of that. Many people have their own Geiger counters, and they report that radiation levels in all populated areas are well below the danger level.

Related external link: [Fukushima panic breaks completely free of the facts!](#)

One reason why the Japanese people have such low crime, and are so honest and hardworking is because the Japanese culture was heavily influenced by New Testament teachings over 1500 years ago. This knowledge was lost when all historical records in a certain place were burned in a fire. For more information about the hidden Biblical roots of Japanese culture, please see:

[Message from an acquaintance of the people who are fighting the radiation leak in the crippled nuclear power plant in Fukushima](#)

I received the following email from a friend about the situation of the nuclear power-plant in Fukushima.

Dear everyone,

I have an urgent request for prayer. Right now there are people who are giving their all to save our country, its people, and you and your family at the risk of their lives at Fukushima atomic power plant. Please pray for the success of their work.

The Soldiers of Special chemical troop of Defense army (those who are working at the plant now) are volunteers who are above 55years old, who believe that their responsibility to their families (raising their children) is nearly over. They have volunteered to do this work. There are 50 such volunteers.

This is an excerpt from an article in JIji-tsushin□

Tokyo Electric Company has asked different cooperative firms for help of volunteers who would be a suicide squad to do the technical work inside of atomic power house.

One of the volunteers who has been working at an atomic power plant in West Japan for 40 years volunteered saying he would have only one year till his retirement and his children are grown up now. His family couldn't dissuade him. He is quiet but firm in his determination that such a difficult job should be done by veterans like him. His daughter said this is a side of her father that she has never seen before. The next day, 20 more volunteers left their homes for this mission as if it was a usual morning of going to work.

Working under such conditions at atomic power plant, it is usual to be exposed to radiation. The allowed amount of contamination during such work is limited by the government to 100msv. But this number was changed from 100msav to 250 msv because those volunteers have requested to lift the limit so that they would have enough time to do their work. So they were prepared to risk high doses of radiation.

The peace that we still enjoy now is due to their sacrifice...
Please everyone, pray!
Please pray that the mission can be completed.
Please pray that the future missions awaiting will be successful.
Pray for the safety of these workers.

Please tell all of your friends, family members, and as many people as possible
Ask them to join us in prayer for this.
