

Unmasking the Deep State in America

Most Americans have never heard of the Council on Foreign Relations. Although unseen and unknown, it has exerted tremendous power and control over the decision-making process in America throughout most of the 20th century.

Insights of World War II, the Creation of Israel, & the Purpose of the United Nations

With the creation of Israel by the UN the Jesuits hoped to cause such bloodshed there that the world would cry out for a peacemaker – the Pope.

Roman Catholicism By Lorraine Boettner Chapter XIX A System Tested by its Fruits

The Roman Catholic Church's interpretation of the Scriptures is so erroneous and its practices are so persistently unchristian that over the long period of time its influence for good is outweighed by its influence for evil. It must, therefore, as a system, be judged to be a false church.

Roman Catholicism By Lorraine Boettner Chapter XVII By What Moral Standard?

One of the strong contrasts between Protestantism and Roman Catholicism is found in the moral codes. In Protestantism this code is taken directly from the Bible.

Have You Been Hoodwinked by Israel?

Christians should NOT support the modern state of Israel. Its government is officially antichrist. The children of Abraham are those who belong to Jesus Christ.

[The US Federal Reserve System Changed the Definition of Money](#)

This is a transcription of a talk by [Kirk Elliott, Ph.D.](#), the founder of Sovereign Advisors, a consulting firm that helps investors with wealth management.

The “Federal Reserve” or FED as it’s called, is a misnomer. It’s not a part of the American federal government, and there’s no reserve. Its a private monopoly on money creation granted by the U.S. Government. It’s a corporation of banking cartels. To learn more about that, please read [The Creature from Jekyll Island by G. Edward Griffin](#).

Transcript

Before I can give a solution, I have to kind of show where we’re headed and how quickly, because they have mapped out the timeline now. It’s not us. And it’s here. And it’s right now.

Central bank digital currency has the ability to cut you off from buying or

selling if your ideology doesn't match up with theirs! These are their words, not mine. This started in August of 2019.

So [Federal Reserve docket OP – 1670](#). What is it? What does it say? I'm going to read it exactly so I don't misquote it.

“The main economic attributes of a technically effective currency rests on three functions: as a unit of account, a store of value and as a medium of exchange.”

That's what money actually is. So you have something you can trade back and forth with each other. It has a store value and a medium of exchange.

But, they added a fourth definition of money at the Federal Reserve. And that is the fourth definition of money as a means of social control.

It has nothing to do with fixing the System. In their own words, “Money is a means of social control.”

If you really wanted to control a person, you cut them off from buying or selling, their ability to live. Now you control that person. Now you've got a whole world, or in America, 330 million economic slaves. Right?

On Nov. 8th 2019, a patent was filed 62-758430. Who did this? Visa! The credit card company. What is their patent? Basically, it talks about how in this patent, they want to change money from paper to digital money. And every new digital currency that's created, they're going to take out a paper currency unit. Why? Because you can't track private paper money. You can go to a farmer's market. You can go anywhere. Nobody knows that you're spending money if you use paper. But they can track everything if it's digital. So to bring in a digital system, they have to get rid of the old. They're getting rid of their private-based currency.

Now, it goes a little bit further. March 23, 2020, HR 6321. Okay, Maxine Waters is responsible for this one. So financial protections and assistance for Americans, consumers, states, businesses, and vulnerable populations act. And this is what this is called. So what is it? It's direct stimulus payments for families, for renters. It's a social credit score for universal basic income!

Now, what is required for that? Number one, a digital dollar. Number two, a digital dollar wallet. Number three, a member bank that will actually accept digital dollars. So here's the thing. If you want to receive the government stimulus, you have to have a digital dollar. There is no other option.

Now extend that out a little bit further. If you want social security, well, they've already passed a bill that says if you want stimulus, what about social security? What about government pensions? What about any kind of government payment for retirement, anything? If you want it, you have to be part of that Beast System. And it's already.

As I read through the Bible as a kid and as an adult, it's like, how in the world could this Antichrist and the Mark of the Beast happen? People knew that it was coming. So in this sense, it's like, oh, it clicked, it makes sense. Even Christians, if they say, "I don't get my retirement? I don't get any payments unless I take the system? Well, I guess I might as well take the system," right?

I believe that it is the Book of Revelation actually happening. Yeah, I mean, if it looks like a duck, smells like a duck, walks like a duck, it's probably a duck, right? And these are in their own words, the ability to cut you off from buying or selling if they don't like your ideology. I don't know what else it is.

So then, here's when the rubber hits the road. March 6, 2022, executive order 14067. Biden penned it. Basically, that says, we're going to have central bank digital currency in America. March 29th, 2022, they start to talk about the ideology. Dr. Pippa Malmgren at the World Government Forum in Abu Dhabi. What did she say? She said, "Programmable money is the core of central bank digital currency." Programmable! Meaning, if we don't like you, we can flip the switch so you can't actually have your money. That's what programmable money means.

Then you go to March of 2023, the United Nations, our common agenda policy brief, right? So here's where the UN General Secretary says, "I propose that the General Assembly provide the Secretary-General and the United Nations system with a standing authority to convene an operationalized, automatically in an emergency, platform, in the event of a future complex global shock of sufficient scale severity and reach."

They're telling you we're going to use a crisis to do this. So what was that first crisis? COVID. What's the second crisis? Bank failure. What's the third crisis? Is it something worse than going on a health scare? A war? A war. I mean, so here's where they tell us. They tell us what could trigger it. I'm not making stuff up. I just read what they say.

So, you go to the next paragraph in this agenda policy brief, what could trigger the emergency authority? A major climatic event, a future pandemic risk, a global digital connectivity disruption, a major event in outer space, and a generic unforeseen risk like a solar flare.

So here's what it says at the end of it. It also states that while the emergency authority would have an initial finite lifespan, the UN could be able to extend it indefinitely.

Carbon Dioxide is Not a Pollutant!

In light of the current (30 November until 12 December 2023) United Nations Climate Change Conference in UAE, also known as COP 28, I feel led by the Lord to write something about the so-called climate change crisis. COP stands for Conference Of the Parties under the UN Framework Convention on Climate Change (UNFCCC). In case you don't know it, the UN is not our friend.

Christiana Figueres, the Executive Secretary of the UNFCCC, stated in an interview that the Earth is already overburdened with people and that we should look at depopulating the planet.

She also said: (Quotes from https://www.azquotes.com/author/32264-Christiana_Figueres)

We have to get to the point where each individual, each corporation, each community chooses low carbon, because it makes fundamental sense. It should become a no-brainer.

DEMAND, PURCHASE & USE LOW CARBON PRODUCTS AND SERVICES. MAKE LOW CARBON SEXY!

The transition to a low-carbon economy will be much more painful if we wait until there is a climate crisis before recognizing that more than half of the world's fossil fuel reserves will have to remain in the ground.

Based on the many things I have heard over the years, the real reason behind the agenda of limiting carbon dioxide into the air is to purposely hurt the economy by increasing the cost of energy. Low-cost energy creates a strong middle-class economy, and this is what the New World Order elite do not want. The middle class has, from the elite's perspective, too much time to think! Rational thinking leads to awareness of government corruption and abuse of civil rights which results in public protests, something no government wants.

Christiana Figueres confirmed this view by actually admitting that the goal of environmental activists is not to save the world from ecological calamity but **to destroy capitalism!**

"This is the first time in the history of mankind that we are setting ourselves the task of intentionally, within a defined period of time, to change the economic development model that has been reigning for at least 150 years, since the Industrial Revolution."

The middle class in England grew as a result of the Industrial Revolution which began in the late 18th century.

As a group, the middle class saw enormous benefits from the industrial revolution. The growth of new businesses and factories created thousands of new jobs. The middle class itself grew in size as occupations like merchants, shopkeepers and accountants allowed the working class to lift themselves into a higher social strata. – Source:

<https://www.theclassroom.com/differences-between-wealthy-middle-classes-poor-industrial-revolution-17180.html>

The Industrial Revolution created great wealth in England through the manufacture and sale of goods. Factories need a lot of energy to operate and that energy came from the low cost petroleum of that time, what the elite

call "fossil fuel." Fuel made from crude petroleum wasn't taxed then as it is today. It turns out that the [origin of petroleum may be abiogenic](#) and not from fossils of decayed organic matter! If so, it may be limitless and the price could go down drastically. But that's not what the ruling elite want to happen.

Bill Gates in an interview stated his ambitious goal is for the world to decrease CO₂ to zero by year 2050. In the meantime he confesses to being an 'imperfect messenger' as he lives in large houses and travels by private jet. [He owns four of them](#) which he used for 392 flights last year, more than once per day!

The climate may be changing but it's not the result of CO₂ emissions. It's either natural as a result of solar activity and/or it could be [malicious weather modification, something the US military learned how to do during the Vietnam War](#).

Quote from [There Is No Climate Emergency, Say 500 Experts in Letter to the United Nations](#)

On the same day last week that Greta Thunberg made an impassioned speech to the United Nations about her fears of a climate emergency, a group of 500 prominent scientists and professionals, led by the CLINTEL (Climate Intelligence) co-founder Guus Berkhout, sent this registered letter to the United Nations Secretary-General stating that there is no climate emergency and climate policies should be designed to benefit the lives of people.

The made points in the letter are [listed on CLINTEL's website](#):

There is no climate emergency

A global network of over 1800 scientists and professionals has prepared this urgent message. Climate science should be less political, while climate policies should be more scientific. Scientists should openly address uncertainties and exaggerations in their predictions of global warming, while politicians should dispassionately count the real costs as well as the imagined benefits of their policy measures.

Natural as well as anthropogenic (caused by humans) factors cause warming

The geological archive reveals that Earth's climate has varied as long as the planet has existed, with natural cold and warm phases. The Little Ice Age ended as recently as 1850. Therefore, it is no surprise that we now are experiencing a period of warming.

Warming is far slower than predicted

The world has warmed significantly less than predicted by IPCC ([The Intergovernmental Panel on Climate Change](#)) on the basis of modeled

anthropogenic forcing. The gap between the real world and the modeled world tells us that we are far from understanding climate change.

Climate policy relies on inadequate models

Climate models have many shortcomings and are not remotely plausible as global policy tools. They blow up the effect of greenhouse gases such as CO₂. In addition, they ignore the fact that enriching the atmosphere with CO₂ is beneficial.

CO₂ is plant food, the basis of all life on Earth

CO₂ is not a pollutant. It is essential to all life on Earth. Photosynthesis is a blessing. More CO₂ is beneficial for nature, greening the Earth: additional CO₂ in the air has promoted growth in global plant biomass. It is also good for agriculture, increasing the yields of crops worldwide.

Global warming has not increased natural disasters.

There is no statistical evidence that global warming is intensifying hurricanes, floods, droughts and suchlike natural disasters, or making them more frequent. However, there is ample evidence that CO₂-mitigation measures are as damaging as they are costly.

Climate policy must respect scientific and economic realities

There is no climate emergency. Therefore, there is no cause for panic and alarm. We strongly oppose the harmful and unrealistic net-zero CO₂ policy proposed for 2050. If better approaches emerge, and they certainly will, we have ample time to reflect and re-adapt. The aim of global policy should be 'prosperity for all' by providing reliable and affordable energy at all times. In a prosperous society men and women are well educated, birthrates are low and people care about their environment.

Those are statements from honest scientists!

I have a scientist friend, Dr. John Gideon Hartnett, who also exposes the UN Climate Change policies as a scam. The following facts are from his Bible Science Forum website: [Decarbonise the planet, are they mad?](#)

The lie that sits beneath the climate change movement is that there is excess carbon dioxide in the atmosphere. Who says and by what definition? There is no climate catastrophe – some have even called the ideology a total fraud. But there is plenty of money to be made and so Big Oil backs these schemes to suck the life out of the planet.

How deluded do you need to be? Carbon dioxide is not a pollutant. It's **plant food. It is essential to life**, all life (directly or indirectly), yeah, except for maybe some deep sea worms, and anaerobic bacteria.

STAGES OF PHOTOSYNTHESIS

There are four essential ingredients for green plants to grow and produce oxygen and sugars. The sugars are the food for animals and humans. The sugars in grasses are what the herbivores (animals like cows and sheep) convert into protein, which we need as a species to survive. And carnivores eat the herbivores, thus all species are included.

Those four essential ingredients are **sunlight, carbon dioxide, water** and **minerals**, especially magnesium. Sunlight, carbon dioxide, and water – atmospheric molecules – are all demonized as greenhouse gases causing global warming. In addition, nitrogen, another atmospheric molecule, an essential plant fertilizer, is also considered pollution.

NASA says the earth is getting greener as a result of more CO₂ emissions!

A quarter to **half of Earth's vegetated lands** has shown **significant greening over the last 35 years** largely due to rising levels of atmospheric carbon dioxide, according to a new study published in the journal Nature Climate Change on April 25.

An international team of 32 authors from 24 institutions in eight countries led the effort, which involved using satellite data from NASA's Moderate Resolution Imaging Spectrometer and the National Oceanic and Atmospheric Administration's Advanced Very High Resolution Radiometer instruments to help determine the leaf area index, or amount of leaf cover, over the planet's vegetated regions. The greening represents an increase in leaves on plants and trees equivalent in area to two times the continental United States.

Green leaves use energy from sunlight through photosynthesis to chemically combine carbon dioxide drawn in from the air with water and nutrients tapped from the ground to produce sugars, which are the main source of food, fiber and fuel for life on Earth. Studies have shown that **increased concentrations of carbon dioxide increase photosynthesis, spurring plant growth.**

What does that mean in relation to the United Nations climate change agenda? It means to me purposely decreasing the amount of carbon dioxide into the air will *decrease* plant growth! There's even talk about cutting down carbon dioxide in the air by [capturing it to permanently storing it underground!](#) Utter madness!

All Christians should pray against COP 28.

Whenever there is worldwide deception, we know Satan is behind it for the Bible says:

Revelation 20:7-8 And when the thousand years are expired, Satan shall be loosed out of his prison, And shall go out to **deceive the nations** which are in the four quarters of the earth,...
